

230 吨重大件设备顺利靠泊太仓润禾码头，自日本室兰港跨洋抵港完成交付

近日，由日本室兰港启运的 230 吨重大件设备，历经远洋航行，安全抵达太仓润禾码头，顺利完成卸船作业。本次重件跨洋运输项目圆满落地，再次验证了团队在国际重大件件杂货物流领域的综合实操能力。

本次承运设备单件重量达 230 吨，属于超高难度重大件货物，自日本室兰港装船启运，跨海运抵长江太仓润禾码头。重大件远洋运输对船舶稳性、海上绑扎加固、码头吊装方案均有严苛要求。项目前期，项目组完成航次风险评估、吊装方案评审、港口多方协同对接，全程跟进船舶航行动态，提前预判气象与潮汐影响，制定专项卸货应急预案。

船舶靠泊后，现场作业团队严格按照既定方案，统筹船方、码头、吊装班组协同作业，严控吊装重心、吊点受力，精准把控每一步操作，平稳完成 230 吨重件卸船，设备完好无损，顺利落地码头堆场。

未来，我们将持续深耕国际重大件物流业务，依托成熟的全球港口资源与项目实操经验，为海内外客户提供稳定、安全、一体化的大件海运及港口装卸全链条解决方案。

230-Ton Heavy-Lift Unit Successfully Discharged at Taicang Runhe Terminal after Sailing from Muroran, Japan

Recently, a 230-ton heavy-lift piece of equipment, shipped from Muroran Port in Japan, has safely arrived at Taicang Runhe Terminal upon completion of its ocean voyage, with discharge works finished without incident. This successful delivery of the cross-border heavy-lift project further highlights our team's proven expertise in international heavy-lift and breakbulk logistics.

We handled this 230-ton single unit, a technically demanding heavy cargo, which was loaded at Muroran Port and transported across the sea to Taicang Runhe Terminal on the Yangtze River. Heavy-lift ocean carriage imposes stringent requirements on vessel stability, sea lashing & securing, as well as terminal lifting methodologies. During the pre-project phase, our team conducted voyage risk assessments, reviewed lifting plans and coordinated with multiple port stakeholders. We closely monitored vessel transit, anticipated adverse weather and tidal variations in advance, and prepared a dedicated emergency response plan for discharge operations.

Upon vessel berthing, our on-site team worked hand-in-hand with the ship's crew, terminal operators and lifting gangs, strictly following the approved work procedure. Lifting center of gravity and sling loads were continuously monitored throughout the whole operation. The 230-ton heavy-lift unit was safely lifted ashore and positioned on the terminal yard in immaculate condition.

Moving forward, we will continue to strengthen our capabilities in international heavy-lift logistics. Drawing on our extensive global port network and hands-on project delivery experience, we provide reliable, safe and integrated end-to-end solutions covering heavy-lift ocean transportation and port stevedoring for clients worldwide.
